

TeacherPlus Gradebook

A Complete Web Gradebook Designed for AdminPlus Schools

TeacherPlus Gradebook is an easy-to-use, web-based gradebook designed specifically for AdminPlus schools. Teachers can access their gradebooks and evaluate student performance at any time on multiple devices.

- ✓ Fully integrated with AdminPlus and PlusPortals
- ✓ Built with advanced HTML5 framework
- ✓ Full functionality on Mac and PC
- ✓ Apps for iOS® and Android devices

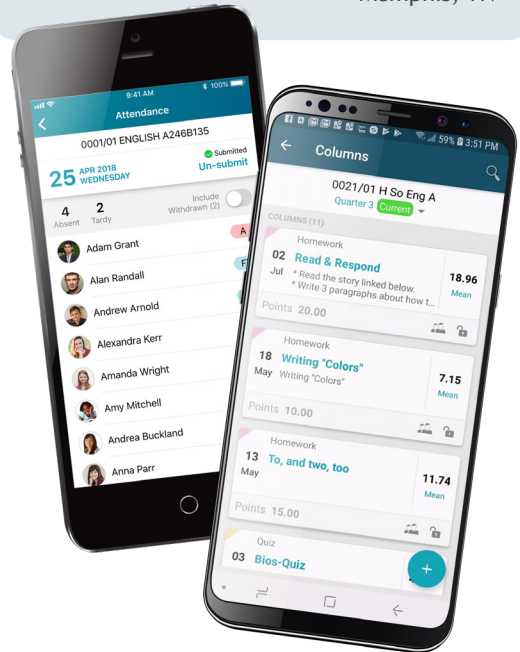

Why TeacherPlus Gradebook?

- **For all school types:** TeacherPlus Gradebook is designed to fit the needs of all grade levels. Elementary teachers can enter skills, narratives and comments while middle and high school teachers have access to weighted grades and automatic calculations, means, medians, and averages.
- **Real-time dashboards** and graphs give an instant, overall picture of each student's performance and attendance record.
- **The advanced HTML5 framework** offers cross-browser compatibility without requiring plug-ins and a responsive user experience on mobile devices.
- **Intuitive features** include user-defined columns with filters for fast drill-downs, batch options for widespread changes, grade annotations, and more.
- **Frontline IEP Interface:** With the seamless sharing of demographic data between AdminPlus and Frontline IEP, teachers can view IEPs from Frontline IEP while using our TeacherPlus Gradebook.

“

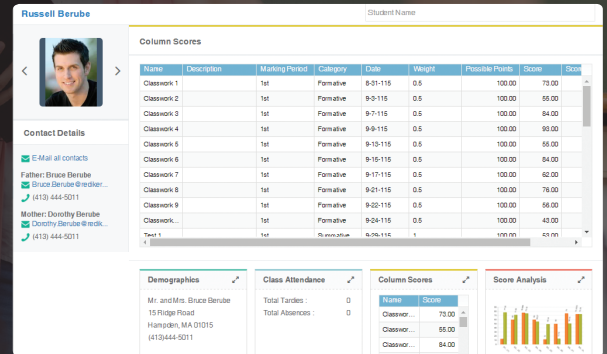

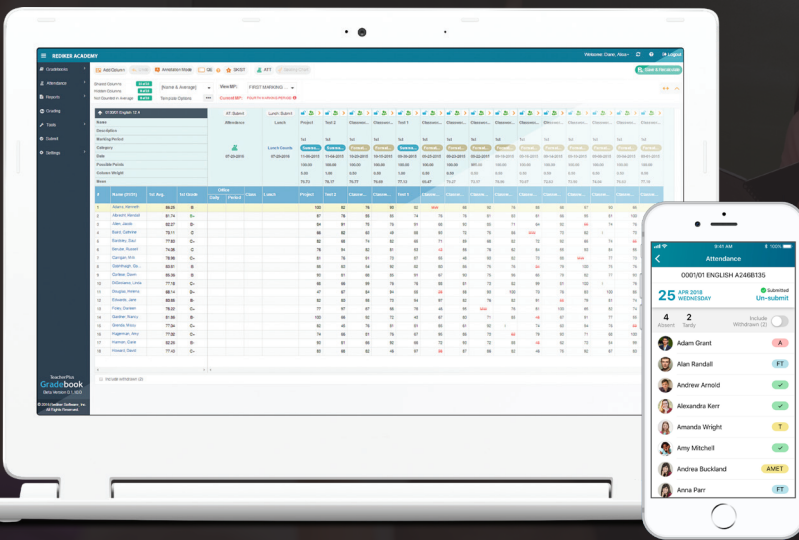

“Taking attendance with an iPhone was a much requested feature around here - we're glad you came out with a TeacherPlus App for iPhones, it's already very popular. We appreciate you guys delivering on that.”

Jay Sansing
Database and Systems Administrator
Grace-St. Luke's Episcopal School
Memphis, TN

AdminPlus

Access gradebooks at any time with iOS and Android devices.

- **The TeacherPlus Management Site** allows administrators to manage all teacher gradebooks at an enterprise level. They can create universal grading tables, build a skills/standards bank and manage what data teachers can view.
- **Grades can be made live** for parents and students to view on the ParentPlus and StudentPlus web portals.
- **Customize your view.** Decide how you want to view information by color-coding categories, hiding and unhiding columns, expanding columns, and setting certain demographic fields to appear as columns within the gradebook.
- **Assign co-teachers** to a class section to grade assignments, take attendance, view student data, and more.
- **Access built-in reports,** including progress reports, birthday lists, means, medians, averages, and much more.
- **Email contacts** such as parents and students directly within TeacherPlus Gradebook.
- **Enter daily and period attendance** by using the picture seating chart.
- **Enter lunch counts** to inform your school cafeteria who will be ordering lunch that day.

Standards-Based Grading in TeacherPlus Gradebook

Standards-based grading communicates how a student is performing against a set of essential standards. Our powerful, flexible gradebook helps you define and measure students' proficiency on those standards. You can personalize the gradebook to track your schools' grading scales, standards, skills and mastery.

- Define indicators, standards and strands for each course.
- Choose from a range of calculation methods including Power Law, Weighted Averages, Mean of All or Recent Assessments, Median, and more.
- View each student's mastery by standard, or see how all students scored on an indicator or standard.
- Powerful reporting features help you create "grades" that are easily understood by schools, families, colleges and employers.
